Maharishi Speaks

Maharishi's Science of Creative Intelligence, a stable foundation for the eternal wisdom of life to be enjoyed generation after generation.

The knowledge of intelligence has its roots in the eternity of knowledge. Knowledge is eternal because life is eternal.

This eternal value of life—the unbounded, unmanifest field of Creative Intelligence is experienced through the practice of Maharishi's Transcendental Meditation Technique.

Generation after generation, the same unbounded, eternal value of knowledge has been passed on from teacher to student. The knowledge of Maharishi's Science of Creative Intelligence is embedded in a long tradition of teachers.

To establish a stable foundation for this knowledge, the intelligentsia of every generation should be the custodians of this eternal wisdom. This was the inspiration to establish Maharishi Universities.

The name 'Maharishi' means 'great Seer'—one who not only sees reality and lives it in fulfilment, but who is also able to impart the value of being a Seer to everyone on earth. The goal of Maharishi Universities is to create great Seers in all parts of the world in every generation.

The goal and aspiration of Maharishi Universities is to maintain the knowledge of the complete value of life in its purity, so that in every generation both teacher and student grow in knowledge, vitality, and fulfilment together.

As long as the purity of knowledge is maintained, the effectiveness of the Science of Creative Intelligence will be maintained and its benefits secured for all generations to come.

The knowledge of intelligence honours all systems of gaining knowledge. The Science of Creative Intelligence brings fulfilment to the aspirations of all educational systems, all governments, and all organizations to develop the full value of life in the individual and in society.

The Science of Creative Intelligence provides the knowledge of all the Laws of Nature, whereby man does not make mistakes and his life is always spontaneously progressive and fulfilling, in accordance with Natural Law.

The ability to bring fulfilment to the life of every individual and society gave rise to the World Plan, whose aim is to bring this supreme knowledge to every man everywhere. Maharishi Universities are the organizations through which the World Plan is being implemented in all parts of the world.

The goal of the World Plan is to ensure that in this scientific age no man continues to suffer and that every man blossoms in the full value of life, radiates the full value of life, and lives life in fulfilment.

Ideal education through Maharishi's Science of Creative Intelligence: Offering an ideal

system of education for the individual to rise to enlightenment and nations to rise to invincibility.

The ground for success of all activity in society is coherence in collective consciousness. This is brought about by increasing the level of coherence in the consciousness of the individual through Maharishi's Transcendental Meditation Technique.

Higher consciousness should be the goal of higher education, and success in every undertaking should be the achievement of every educated man. Maharishi Universities are creating enlightened individuals whose thought and action are from the level of Transcendental Consciousness, the field of all possibilities. Action from this level is evolutionary, fulfilling, and successful.

Suffering has been a part of life because consciousness was not a field of study in education: the knower was not realized and therefore knowledge remained baseless and unfulfilling.

By providing knowledge of the knower, Maharishi Universities expand the student's learning ability. When the student's mental potential is fully unfolded, his thoughts will be most powerful and will be in accordance with Natural Law. All his thought and action will automatically produce a positive influence in the environment.

Maharishi Universities's gift to the world is a more coherent level of world consciousness today. Any country that will imbibe the spirit of Maharishi Universities's programme of education into its educational system will enjoy an ideal society free from problems and invincibility for the nation.

Maharishi European Research University (MERU) in Switzerland is solely devoted to research into consciousness as a field of all possibilities. At MERU, research in consciousness is probing deep into the unmanifest field of Creative Intelligence in order to unfold the full potential of all possibilities in human awareness.

Generations of educators have been longing for a perfect system of education, through which every educated individual would be intelligent, successful, and a glory to his environment. It needed a scientific age to provide a systematic procedure to accomplish this highest ideal of educators.

Maharishi's Transcendental Meditation and TM-Siddhi Programme is this systematic procedure to create an ideal man. This programme is based on the nature of life itself, which is growth and evolution motivated by Natural Law.

Educators everywhere have always been progressive and eager to adopt anything that will enrich education. The establishment of Maharishi International University in all parts of the world will create an invincible family of nations.

Jai Guru Dev, Jai Maharishi

एक और तीर्थ यात्रा

ब्रह्मचारी गिरीश जी
अध्यक्ष,
महर्षि विद्या मन्दिर विद्यालय समूह

मैं अपनी प्रत्येक यात्रा को तीर्थयात्रा ही मानता हूँ क्योंकि मेरी प्रत्येक यात्रा परम पूज्य महर्षि महेश योगी जी की प्रेरणा से किसी उद्देश्य के लिये ही होती है। दूसरा यह कि यह देव भूमि है और इसका कण-कण पूज्यनीय है। अतः मेरी यात्राओं में ये दोनों लक्षण हैं— प्रथमतः यह मेरे आराध्य का आदेश और दूसरा देव भूमि, तीर्थ भूमि भारत की यात्रा। अतः यह तीर्थयात्रा है विभिन्न आकर्षक रूपों में जगह-जगह पर जाकर वहीं के समाज में भारतीय वैदिक परम्पराओं की उपस्थिति का आकलन व उनके पालन से सामाजिक जीवन में आनंद की अनुभूति का एक शोध परीक्षण भी है। भारत भूमि विश्व का एक विशाल देश है। क्षेत्रफल की दृष्टि से भले ही हमें दुनियां के सातवें बड़े देश की उपाधि मिली है किन्तु पौराणिक और ज्ञान की दृष्टि से हम आज भी सर्वश्रेष्ठ हैं।

मैं दुष्यंत और शकुंतला के पुत्र 'भरत' के नाम से गौरवान्वित भारत की बात कर रहा हूँ। मैं भारत की यात्रा पर निकला हूँ जहां अनेक धर्मों ने जन्म लिया और आज भी अनेक धर्मों की शरणस्थली बना है। मेरा रोम-रोम पुलकित हो उठता है जब मैं भारतीय विरासत को पढ़ता हूँ और जीवन्त रूप में मैं आज भी उन वैदिक सांस्कृतिक आचरणों का पालन करने वाले लोगों से मिलता हूँ जो भले ही आर्थिक रूप से सम्पन्न नहीं हैं किन्तु उन तथाकथित राष्ट्रों के नागरिकों से अधिक संस्कारी हैं जो स्वयं को अत्याधिक विकसित, शक्तिशाली व सभ्य मानते हुए अरबों, खरबों रूपए मूल्य के हथियार बनाए बैठे हैं, जो क्षणभर में समग्र संसार का विनाश कर दें। मैंने भारत में अनेकानेक स्थानों पर ऐसे-ऐसे लोगों से संवाद किया जिनको तथाकथित सभ्य समाज में सम्मान की दृष्टि से नहीं देखा जाता। जिन्होंने जीवन में कभी पेट भर खाना भी न खाया हो, वह भी भारतभूमि को अपनी जीवनदायनी मानकर 'संतोषी सदा सुखी' रूप में चलायमान हैं। उनके जीवन की शक्ति उस परमपिता परमेश्वर में उनकी आस्था है। सम्पूर्ण विश्व इस आस्था की शक्ति से आश्चर्यचकित है।

विश्व में गुरुदेव के आशीश व परमपूज्य महर्षि जी के मार्गदर्शन की प्रेरणा से जाता हूँ। तब अनेक देशों में लोग मुझसे पूछते हैं कि जीवन क्या है? तो सदैव उनसे कहता हूँ कि 'अध्यात्म' शब्द को मैं जितना अधिक जानता जा रहा हूँ उससे निष्कर्ष निकालता है कि वही एकमात्र जीवन का सार है। यह एकमात्र शब्द सर्वस्व के कल्याण के लिये युगों-युगों से प्रतिबद्ध है और आध्यात्म ही सम्पूर्ण विश्व को सुख, शांति, समृद्धि की माला में पिरो सकता है। धीरे-धीरे आध्यात्मिकता हमारी सोच, जीवन और कार्यों में परिवर्तित हो रही है और जिस प्रकार से यह गतिमान है बहुत शीघ्र ही वर्तमान समय के समाज में व्याप्त नकारात्मकता को सकारात्मकता में परिवर्तित कर जीवन आनन्द में वृद्धि हो जावेगी। आध्यात्मिक दृष्टि लम्बे समय के लिये आने वाले परिवर्तनों के अतिरिक्त समाज में सभी स्तर पर सकारात्मकता की वृद्धि करती है। हम भी विश्व की एक ईकाई हैं। आध्यात्म यह कहता है कि जो परिवर्तन आप विश्व में लाना चाहते हो उसे सर्वप्रथम स्वयं में लेकर आओ किन्तु यह मानव प्रकृति है कि उसके पास स्वयं को भीतर से देखने का न तो समय है और न ही उत्सुकता है। स्वयं से स्वयं का साक्षात्कार कराने के लिये परम पूज्य महर्षि महेश योगी जी ने 'भावातीत ध्यान योग शैली' को प्रयास रहित शैली कहा है जो हमें स्वयं से मिलती है, अपनी नकारात्मकता को सकारात्मकता में परिवर्तित करने का सामर्थ्य प्रदान करती है। हम धीरे-धीरे अपने प्रतिदिन के कार्यों को बड़ी ही सहजता व निपुणता के साथ आनंदित होकर करने लगते हैं क्योंकि 'जीवन में आनन्द का प्रस्फुटन होने लगता है।'

We also seek their blessings for successful achievements in the coming years.' He further said that 'The personality of Shri Guru Dev was so magnetic that it attracted Maharishi Mahesh Yogi Ji to become his devoted disciple and transformed the whole world with ancient Indian Vedic Knowledge and Technologies. For the greater part of his life Shri Guru Dev lived in quiet, lonely places, the habitats of lions and leopards; in hidden caves and thick forests of the Vindhyagiris and Amarkantak mountain ranges.

‘Shri Guru Dev was out of sight of man but was well marked in the eyes of the destiny of the country. For more than 165years, the principal seat of Shankaracharya of Jyotir-Math in Badrikashram, Himalaya was vacant, and North India had no Shankaracharya to guide the spiritual destiny of the people.

‘It took a long time, twenty years, to persuade Shri Guru Dev to come out of his solitude and accept the holy throne of Shankaracharya of Jyotir-Math in Badrikashram, Himalayas. At the age of 71, in the year 1941, a well-marked time in the political and religious history of India, he was installed as Shankaracharya of Jyotir-math, and that was the sturning point in the destiny of the nation. The political freedom of the country dawned under his divine grace, and he was revered by Dr. Rajendra Prasad, the first President of India.

At the conference of the eminent philosophers of the world during the Silver Jubilee Celebrations of the Institute of Indian Philosophers, held at Calcutta in December 1950. Dr. S. Radhakrishnan, the famous philosopher and the successor of Dr. Rajendra Prasad as President of India, addressed Shri Guru Dev as “Vedanta Incarnate” (Truth Embodiment).’

Brahmachari Girish Ji very happily declared that we are very fortunate to be direct descendants of the knowledge of Shri Guru Dev and his most dedicated disciple His Holiness Maharishi Ji.

Global Tiger Day

The world is observing Global Tiger Day! Established in 2010 at Saint Petersburg Tiger Summit, July 29th is dedicated to worldwide awareness and support for tiger conservation. Less than a century ago, 100,000 tigers roamed the forests of Asia, but today's reality is that there are only 4000 tigers are surviving in their natural environment. India is currently home to nearly 3000 tigers marking a 33% jump in their number from the last census four years ago.

According to the fourth round of tiger census, there are currently 2967 tigers in India in 2018 as against 2226 in 2014. This means an increase of 741 tigers in the last four years because of the conservation initiatives taken by the Centre and state governments. Compared to 2006 when the scientific method of tiger counting began, the numbers doubled – from 1411 in 2006.

Since 2006, India has been conducting the all India tiger estimation once every four years. Three cycles of the estimation have already been completed in 2006, 2010 and 2014. In the previous census, Karnataka (406) housed the maximum number of big cats followed by Uttarakhand (340) and Madhya Pradesh (308).

Though India launched Project Tiger in 1973, the National Tiger Conservation Authority (NTCA) was set up only in 2006. It came as a response to the drastic fall in tiger numbers as highlighted by the local extinction of tigers in Sariska and Panna Tiger reserves. With the primary issues of poaching, habitat destruction and man-animal conflict, the future of India's iconic Big Cat remains a matter of great concern.

Apart from tackling the serious issue of poaching and trade in tiger parts, one of the main issue that require immediate attention in regard to tiger conservation is the fragmentation, degradation and shrinking of habitat. A rise in the encroachments into protected areas, deforestation and conversion of buffer zones into farmland are dangerous for tiger's life. It resulted in shrinking of sizes of tiger reserves.

Despite Maharashtra not having the highest tiger population in the country, the state has recorded the maximum tiger deaths plus body parts seizures this year so far. Today India has almost twice the number of tigers than it did a decade ago; however, the threats to India's big cats remain as potent as ever. India's reported tiger deaths related to poaching peaked in 2016, according to World Wildlife Fund-India. There were 50 poaching-related deaths in 2016, according to the Wildlife Protection Society of India, the highest in 15 years.

Those who study English literature must be knowing British poet William Blake's famous poem on tiger

Tyger Tyger, burning bright,
In the Forests of the Night;
What immortal hand or eye,
Could frame thy fearful symmetry?

Poet, painter and visionary William Blake worked to bring about a change both in the social order and in the minds of men. Blake wrote this poem in 1774, there were around 100 thousand tigers roaming this planet in the Nature. In the second line, the poet writes about, 'Forest of the Night' which is the home of the tiger. There were hardly one billion people on the planet and there was no Global Tiger Day celebration then.

Madhya Pradesh was declared to be number one state having number of tigers leaving behind Karnataka. Congratulations to Forest and Wildlife department of Madhya Pradesh and also to the PCCF (wildlife) Dr. U Prakasham and his team.

"India Growing in Positivity with Rise of Coherence in Collective Consciousness"

Engineering dropout to organic farmer growing 300 [plus] native veggies: TN man's inspiring story!

The Better India reported: In the village of Kuttiyagoundanpudur, close to the arid region of Oddanchatram in Tamil Nadu's Dindigul district, lies Aadhiyagai Parameswaran's six-acre farm. The area lacks a perennial source of water to keep crops well-fed, but 29-year-old aeronautical engineer-turned-farmer, Parameswaran is confident his farm will thrive. His crops can withstand severe drought conditions because they are native to this arid region. We view this news as a sign of rising positivity in the fields of environment and business, documenting the growth of life-supporting, evolutionary trends.

Apart from growing chemical-free food, he also created a seed bank named Aadhiyagai (which means first blooming in Tamil), with more than 300 native vegetable and fruit seeds. Collected and documented over the past five years, he now distributes them to farmers in the neighbourhood and youngsters in cities and towns.

India to add 5,000 [plus] electric buses in 65 cities in ongoing massive EV push

An Indian government committee has sanctioned 5,645 electric buses for 65 cities in one of the largest electric bus initiatives the world has seen outside of China.

The announcement came on Twitter from Amitabh Kant, the CEO of the government's Niti Aayog commission. Kant tweeted about approval for the buses, which will be made in India by eight State Transport Undertakings: This was Kant's only tweet thus far on the subject, but the Niti Aayog CEO recently gave an interview to the Economic Times about the country's EV plan. India looks to push the manufacturing of electric car batteries domestically, and there are still plans for major electrification of the country's two- and three-wheelers.

The country is also particularly focused on using clean energy to charge its expected boom in electric vehicles. Kant said, "Our objective is to clean up cities, reduce imports, and utilize the sun and its energy for driving electric vehicles."

The announcement about electric buses follows another announcement this weekend that India will be cutting taxes on electric vehicles — it's reducing the electric car tax from 12% to 5%, and cutting taxes on EV chargers from 18% to 5%.

While no time frame has been given yet for when India seeks to have these thousands of electric buses in place, the initiative stands out, both for its number of cities and its sheer size.
